Dear Parent:

The Alabama State Department of Education and Alabama Department of Public Health requires that school districts in Alabama offer and provide scoliosis screening for male and female students in grades 5 through 9.

Screening is performed by observing the uncovered spine, viewing the student from the back, side, and front and also from all sides with the student bending forward. If a spinal problem is suspected, the child will be rechecked at a second screening. Parents of students found to have signs of a possible spinal abnormality will be asked to see their own physicians for further evaluation.

Girls and boys will be screened separately on to ensure privacy. It is suggested that girls wear a halter-top or bra and boys remove their shirts for the screening. Screening for your child will take place within the next month. If your child is currently under treatment for a spinal deformity, please let us know and your child will be exempt from the screening process.

Please complete the consent form below; indicating your wishes for screening, and return by [February 19, 2019](#).

Please note: forms not returned will result in student not being screened.

I **do wish** for my son/daughter to be included in the scoliosis screening.
